A phylogenetic tree illustrating the evolutionary relationships among various species of Viperidae. The tree is rooted on the left and branches out to the right. The species names are listed on the right side of the tree, corresponding to the terminal nodes. The tree shows a clear division into several major clades, including the Outgroup, Causus, Bitis, Atheris, Echis, Pseudocerastes, Eristicophis, Vipera, Montivipera, Daboia, Cerastes, and Vipera. The tree is rooted on the left, with the Outgroup at the top. The main body of the tree branches out to the right, showing the relationships between the various species. The species names are listed on the right side of the tree, corresponding to the terminal nodes. The tree shows a clear division into several major clades, including the Outgroup, Causus, Bitis, Atheris, Echis, Pseudocerastes, Eristicophis, Vipera, Montivipera, Daboia, Cerastes, and Vipera.

Phylogenetic tree showing relationships among various species of Viperidae. The tree is rooted on the left and branches out to the right. The species names are listed on the right side of the tree, corresponding to the terminal nodes. The tree shows a clear division into several major clades, including the Outgroup, Causus, Bitis, Atheris, Echis, Pseudocerastes, Eristicophis, Vipera, Montivipera, Daboia, Cerastes, and Vipera.

Species listed (from top to bottom):

- Outgroup
- Causus_defilippii
- Causus_resimus
- Causus_maculatus
- Bitis_peringueyi
- Bitis_parviocula
- Bitis_harennia

A phylogenetic tree illustrating the evolutionary relationships among various species of Viperidae. The tree is rooted on the left and branches out to the right. The species names are listed on the right side of the tree, corresponding to the terminal nodes. The tree shows a clear division into two main clades, each supported by a bootstrap value of 100. The first clade includes species from the genera Echis, Causus, Bitis, and Atheris. The second clade includes species from the genera Pseudocerastes, Eristicophis, Vipera, Montivipera, Daboia, Cerastes, and Vipera. The tree is drawn with black lines on a white background.

Phylogenetic tree showing relationships among various species of Viperidae. The tree is rooted on the left and branches out to the right. The species names are listed on the right side of the tree, corresponding to the terminal nodes. The tree is drawn with black lines on a white background.

[illegible][illegible][illegible]

The diagram consists of a large rectangle divided into three horizontal sections. The top section is white, the middle section is white, and the bottom section is filled with horizontal lines. A small white rectangle is attached to the left side of the top section.

The diagram consists of a large rectangle. A horizontal line runs across the top. A vertical line runs down the right side. Another vertical line runs down the left side, creating a narrow column on the left. A horizontal line runs across the middle, dividing the rectangle into three horizontal sections. The top section is white. The middle section is white. The bottom section is filled with horizontal lines.

The diagram consists of a large rectangle divided into three vertical sections. The leftmost section is white. The middle section is white and contains a smaller white rectangle on its left side. The rightmost section is filled with horizontal lines.
